The earliest surviving record finds the eastern parcel entirely undeveloped, a quiet expanse awaiting the city's northward march. As the register of that era attests, *("In the 1815 Blue Book, on 30 East 18th Street, there is reference to 0 structures.")* For more than three decades thereafter, the land lay in anticipation of the residential terrace that would soon define the block.

That transformation arrived at mid-century, when a distinguished row of dwellings rose along Broadway. The architectural chronicle records their genesis in unambiguous terms: *("ROW HOUSE, No. 862 1847-48; remodeled 1921, by John B. Snook & Sons. [4 stories] It is astonishing that these brick row Houses have survived in any from.")* Its immediate neighbor shared both vintage and pedigree, for the same account observes that *("ROW HOUSE, No. 864 1847-48 (4 stories) Mostly stripped of original architectural fabric, this building still has half-height attic windows.")*

By the following decade the fashionable character of these residences was fully apparent in the cartographic record. The mid-century survey catalogues them with meticulous precision, noting that *("In the 1853 Perris Maps, on 862 Broadway, there is reference to 1 Structure; Brick or Stone dwellings first class (slate or metal roof & coped) with Framed Extension.")* The pattern continued along the terrace, as *("In the 1853 Perris Maps, on 864 Broadway, there is reference to 1 Structure; Brick or Stone dwellings first class (slate or metal roof & coped) with Framed Extension.")* One dwelling stood apart in its detailing, however, for *("In the 1853 Perris Maps, on 866 Broadway, there is reference to 1 Structure; Brick or Stone dwellings first class (slate or metal roof & coped) with Brick or Stone Extension and skylights lighting the top floor only.")* The remaining lots conformed to the prevailing type, so that *("In the 1853 Perris Maps, on 868 Broadway, there is reference*

to 1 Structure; Brick or Stone dwellings first class (slate or metal roof & coped) with Framed Extension,") and likewise ("In the 1853 Perris Maps, on 870 Broadway, there is reference to 1 Structure; Brick or Stone dwellings first class (slate or metal roof & coped) with Framed Extension,") and finally ("In the 1853 Perris Maps, on 872 Broadway, there is reference to 1 Structure; Brick or Stone dwellings first class (slate or metal roof & coped) with Framed Extension.") The eastern parcel, meanwhile, remained conspicuously vacant, for ("In the 1853 Perris Maps, on 30 East 18th Street, there is reference to 0 Structures.")

By the close of the Civil War the block had filled in decisively, and the surveyor of the period reduced each holding to its essential fact. Thus ("In the 1867 Dripps Plan, on 862 Broadway, there is reference to 1 Structure; Building,") just as ("In the 1867 Dripps Plan, on 864 Broadway, there is reference to 1 Structure; Building,") and ("In the 1867 Dripps Plan, on 866 Broadway, there is reference to 1 Structure; Building,") and ("In the 1867 Dripps Plan, on 868 Broadway, there is reference to 1 Structure; Building.") The northern lots proved more densely occupied, for ("In the 1867 Dripps Plan, on 870 Broadway, there is reference to 2 structures; Building, Building,") while ("In the 1867 Dripps Plan, on 872 Broadway, there is reference to 3 structures; Building, Building, Building.") Most tellingly, the once-empty eastern parcel had at last been improved, as ("In the 1867 Dripps Plan, on 30 East 18th Street, there is reference to 1 Structure; Building.")

As the district matured into a commercial thoroughfare, the residential dwellings gave way to enterprise. A directory of the age preserves one such establishment in its listing, recording under ("Shopping Directory. Staten Island Dyeing Establishment, 870 Broadway and 610 Sixth av.") That same year the atlas of the period distilled the material substance of the surviving fabric, noting that ("In the 1885 Robinsons Atlas, on 866 Broadway, there is reference to 1 Structure; Brick building,") and correspondingly that ("In the 1885 Robinsons Atlas, on 30 East 18th Street, there is reference to 1 Structure; Brick building.")

The turn toward the twentieth century brought a fuller accounting of scale and material. The atlas of the late nineties enumerated the row in uniform terms, observing that ("In the 1897 Bromleys Atlas, on 862 Broadway, there is reference to 1 Structure; 4 Story Brick building,") and equally that ("In the 1897 Bromleys Atlas, on 864 Broadway, there is reference to 1 Structure; 4 Story Brick building,") and ("In the 1897 Bromleys Atlas, on 866 Broadway, there is reference to 1 Structure; 4 Story Brick building,") and ("In the 1897 Bromleys Atlas, on 868 Broadway, there is reference to 1 Structure; 4 Story Brick building,") and ("In the 1897 Bromleys Atlas, on 870 Broadway, there is reference to 1 Structure; 4 Story Brick building,") and ("In the 1897 Bromleys Atlas, on 872 Broadway, there is reference to 1 Structure; 4 Story Brick building.") The eastern holding likewise entered the record, for ("In the 1897 Bromleys Atlas, on 30 East 18th Street, there is reference to 1 Structure; Brick building.")

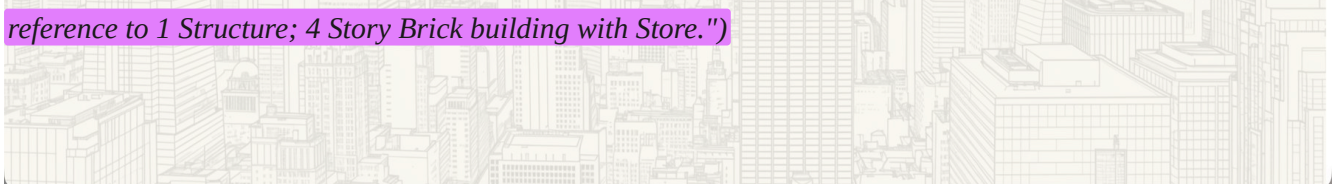

The new century inaugurated an era of ambitious refacing, as the antiquated dwellings were adapted to commercial fashion. The most conspicuous of these transformations occurred at the northernmost address, where, as the designation record relates, ("In 1901, a new stone facade with large show windows was

constructed at No. 872.") A comparable modernization soon followed nearby, for ("870 Broadway received its early-20th commercial style facade as the result of a 1915 alteration.")

By the mid-1910s these alterations were legible in the cartographic record, which now registered ground-floor commerce throughout the block. Thus ("In the 1916 Atlas of the Borough of Manhattan, on 862 Broadway, there is reference to 1 Structure; 4 Story Brick building with Store and Brick Extension and 1 Story Brick Extension,") while ("In the 1916 Atlas of the Borough of Manhattan, on 864 Broadway, there is reference to 1 Structure; 4 Story Brick building with Store and 1 Story Brick Extension,") and ("In the 1916 Atlas of the Borough of Manhattan, on 866 Broadway, there is reference to 1 Structure; 4 Story Brick building with Store and 1 Story Brick Extension,") and ("In the 1916 Atlas of the Borough of Manhattan, on 868 Broadway, there is reference to 1 Structure; 4 Story Brick building with Store and 1 Story Brick Extension.") The recently refaced structures were noted with their distinguishing features, for ("In the 1916 Atlas of the Borough of Manhattan, on 870 Broadway, there is reference to 1 Structure; 4 Story Brick building with Store ,") and ("In the 1916 Atlas of the Borough of Manhattan, on 872 Broadway, there is reference to 1 Structure; 4 Story Brick building with Store and Elevators.") The eastern property, too, had assumed a commercial cast, as ("In the 1916 Atlas of the Borough of Manhattan, on 30 East 18th Street, there is reference to 1 Structure; 4 Story Brick Extension with Store.")

The wave of modernization crested at the southernmost dwelling in the early 1920s, where a storefront was inserted beneath the venerable brickwork. As the designation record explains, ("A ground-story storefront was installed during a 1921 alteration") — a change confirmed by the architectural chronicle's own note that the row house at No. 862 had been ("remodeled 1921, by John B. Snook & Sons.")

The land books of the ensuing decade reflected these commercial adaptations in their entirety. Thus ("In the 1930 Land Book of the Borough of Manhattan, on 862 Broadway, there is reference to 1 Structure; 4 Story Brick building with Store and 1 Story Brick Extension,") and ("In the 1930 Land Book of the Borough of Manhattan, on 864 Broadway, there is reference to 1 Structure; 4 Story Brick building with Store and 1 Story Brick Extension,") and ("In the 1930 Land Book of the Borough of Manhattan, on 866 Broadway, there is reference to 1 Structure; 4 Story Brick building with Store and 1 Story Brick Extension,") and ("In the 1930 Land Book of the Borough of Manhattan, on 868 Broadway, there is reference to 1 Structure; 4 Story Brick building with Store and 1 Story Brick Extension.") The refaced pair retained their distinctive character, for ("In the 1930 Land Book of the Borough of Manhattan, on 870 Broadway, there is reference to 1 Structure; 4 Story Brick building with Store,") and ("In the 1930 Land Book of the Borough of Manhattan, on 872 Broadway, there is reference to 1 Structure; 4 Story Brick building with Store and Elevators.") The eastern address likewise conformed, as ("In the 1930 Land Book of the Borough of Manhattan, on 30 East 18th Street, there is reference to 1 Structure; 4 Story Brick building with Store.")

At mid-century the record was reaffirmed, though now expressed in the broader material vocabulary of the postwar survey. Thus ("In the 1955 Manhattan Land Book, on 862 Broadway, there is reference to 1 Structure; 4 Story Brick or Stone or Concrete building with Store and Brick or Stone or Concrete Extension and 1 Story Brick or Stone or Concrete Extension,") and ("In the 1955 Manhattan Land Book, on 864 Broadway, there is reference to 1 Structure; 4 Story Brick or Stone or Concrete building with Store and 1 Story Brick or Stone or Concrete Extension,") and ("In the 1955 Manhattan Land Book, on 866 Broadway, there is reference to 1 Structure; 4 Story Brick or Stone or Concrete building with Store and 1 Story Brick or Stone or Concrete Extension,") and ("In the 1955 Manhattan Land Book, on 868 Broadway, there is reference to 1 Structure; 4 Story Brick or Stone or Concrete building with Store and 1 Story Brick or Stone or Concrete Extension.") The northern dwellings persisted in their now-familiar guise, so that ("In the 1955 Manhattan Land Book, on 870 Broadway, there is reference to 1 Structure; 4 Story Brick or Stone or Concrete building with Store,") and ("In the 1955 Manhattan Land Book, on 872 Broadway, there is reference to 1 Structure; 4 Story Brick or Stone or Concrete building with Store and Elevators.") The eastern property closed the sequence, for ("In the 1955 Manhattan Land Book, on 30 East 18th Street, there is reference to 1 Structure; 4 Story Brick or Stone or Concrete building with Store.")

In the fullness of time the commercial life of the block found expression in the popular literature of the city. A guide to its offerings recorded, with unaffected enthusiasm, ("Express Manna Kitchen 28 E 18th St (btwn Broadway & Park Ave) 212-228-1044 www.mannakitchen.com (Gramercy Park; 4/5/6/L/N/Q/R to Union Square) Express Manna Kitchen is this fast food Korean place that makes such a good tofu bowl! Eat it! - Dear Drunk Girl.")

The most recent chapter in this long chronicle finds the venerable row house at No. 862 absorbed into the retail geography of a global age. A family guidebook, in describing an Italian purveyor of footwear, noted among its outposts the address in question, observing that ("Geox 575 Madison Avenue, at East 57th Street (212) 355-3029 Subway: 4, 5, 6 to 59th Street; N, Q, R to Lexington Avenue- 59th Street; F to Lexington Avenue-63rd Street www.geox.com Monday-Saturday 10am-8pm; Sunday 11am-7pm This Italian shoe brand ("the shoe that breathes") is the second-best selling brand of sports shoes in Europe, and is distinguished by its design and technology. The perforated outer sole features a waterproof membrane that lets feet breathe, but prevents water from penetrating (science lesson: the membrane's micro-pores are larger than water vapor molecules but smaller than water droplets). Breathable, non-slip, flexible, anti-bacterial, and waterproof or water-resistant, they're ideal for kids. The full line is carried in this U.S. flagship store. Athletic shoes for boys include styles with soccer ball motifs, a style in neon lime and yellow, a white high-top with zipper closure, and a more subdued suede boating shoe. The girls' line includes athletic shoes, casual Mary Janes, studded denim high-top sandals, and a silver mesh ballet flat with a shoelace on the toe and neon lime trim. The kids shoes run from \$60 to \$80. Geox carries Italian sizes 26 through 37/38 (U.S. sizes 9 through 5 ½), and fit

toddlers through about age 8. There's a smattering of kids apparel in the store, as well as the full range of men's and women's shoes and apparel. Additional locations: 731 Lexington Avenue (Upper East Side), 862 Broadway (Union Square to Madison Square).")

Thus the record closes, a continuous thread stretching from a vacant lot of 1815 to the cosmopolitan commerce of the twenty-first century.

Sackersdorff, 1815 *Blue Book*, p. 3

Quotes drawn from this page: 1

building has a delicate commercial façade of cast-iron and glass.

NANCY S. EDWARDS HOUSE, No. 859

1841; remodeled 1869 and 1897. [3 stories] The upper story and bracketed cornice of this brick dwelling are intact.

MOSES L. JACKSON HOUSE, No. 861

1841-42; remodeled 1889. [4 stories] The upper two stories and bracketed cornice are intact.

JOHN FERRIS HOUSE, No. 863

(Also known as Huyler's Candy Store). 1841-42; remodeled 1885, by C.B.J. Snyder. [4 stories] Three upper stories of this old brick dwelling are pretty much intact, as is the cornice.

E.W. CLAWSON HOUSE, No. 865

1843; rebuilt 1869. [5 stories] This façade has round, segmental, and flat arches.

DITSON BUILDING, No. 867-71

(Also known as the Whiting Silver Manufacturing Company). 1882-83, by George W. Pope. [5 stories] This fairly simple and solid façade is enlivened by modest touches like gables and brick brackets.

PARISH BUILDING, No. 860

(Also known as the Butler Building, Lienau Building, Thonet Brothers Depot, Andy Warhol's Factory). 1883-84, by Detlef Lienau; remodeled 1925, by F.H. Dewey & Company. [6 stories] The vigorous original building was considerably watered down to its current yellow-brick version. *Site of* Henry Parish house (also known as the Union League Club).

From 17th to 18th Street, east side, 1987.

ROW HOUSE, No. 862

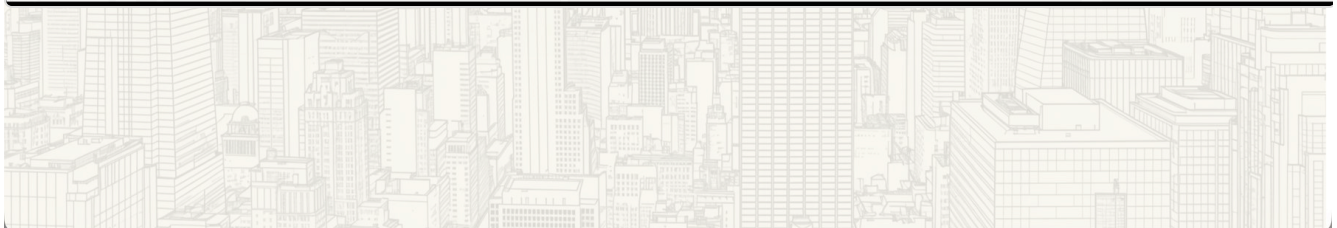

1847-48; remodeled 1921, by John B. Snook & Sons. [4 stories] It is astonishing that these brick row houses have survived in any form. Old window

Jacob Cram House, 1988.

can still be found between Seventeenth and Eighteenth streets and between Twenty-first and Twenty-second streets. Although it is remarkable that any of them survived, perhaps the single most interesting house is 922 Broadway, the remnant of a row built in about 1854 for Jacob Cram. This was converted to a "large and pleasant hotel" called the Bancroft House, which was "furnished with accommodations that cannot fail of giving satisfaction to the most fastidious."⁸

Although the Fifth Avenue Hotel proved in 1860 that society would venture as far as Twenty-third Street, Broadway between Union and Madison squares did not pick up momentum until after the Civil War. Its first major commercial development—the Mortimer Building of 1862, an exquisite Italianate structure at Twenty-second Street that was designed by Griffith Thomas—was occupied for seven years by Bryant, Stratton & Packard's Business College, which taught bookkeeping, law, arithmetic, and penmanship.⁹

Quotes drawn from this page: 3

Arnold, Constable & Company Store, 1979.

It took the dry-goods merchant Aaron Arnold, whose “marble palace” was at Canal and Mercer streets, to see that the city’s retail center was going to keep moving uptown. Where a row of cheap little stores had stood, between Eighteenth and Nineteenth streets, Arnold and the merchant Edwin Hoyt began a remarkable dual development in 1868: two enormous marble buildings with a uniform Second Empire façade, designed by Griffith Thomas. The south building was owned by Hoyt, the north building by Arnold, who lived near Twenty-first Street.¹⁰

Arnold, Constable & Company, which opened its spacious Nineteenth Street store in 1869, was “one of the greatest . . . dry-goods establishments in the world.”¹¹ It took care of wealthy customers—on which it had a near monopoly—“from cradleside to graveside,” providing children’s wear and mourning clothes and practically everything in between.¹² Silks, dress goods, and furnishings filled the first floor; furs and apparel, the second; with three top floors given to upholstery, carpets, and Oriental rugs. The Hoyt Building,

14th STREET–22nd STREET

115

heads remain at No. 862; delicate iron pilasters were added later.

ROW HOUSE, No. 864

1847-48. [4 stories] Mostly stripped of original architectural fabric, this building still has half-height attic windows.

ROW HOUSE, No. 866

1847-48. [4 stories] Of all the houses in the row, this one is in the best condition, with window heads intact on three stories and a simple dentiled cornice.

ROW HOUSE, No. 868

1847-48. [4 stories] Somewhat stripped of detail, this building has remnants of the old window heads.

H. BERGDORF TAILORING SHOP, No. 870

1847-48; rebuilt 1915, by Arthur Sutcliffe. [4 stories] The old brick façade is now broken by bands of horizontal windows.

HAWES BUILDING, No. 872

1847-48; rebuilt 1901, by Frederick Jacobson. [4 stories] Two wide bays with quoined surrounds and big scallop keystones create a striking and unusual façade. Site of Bank of the Manhattan Company branch.

18th STREET

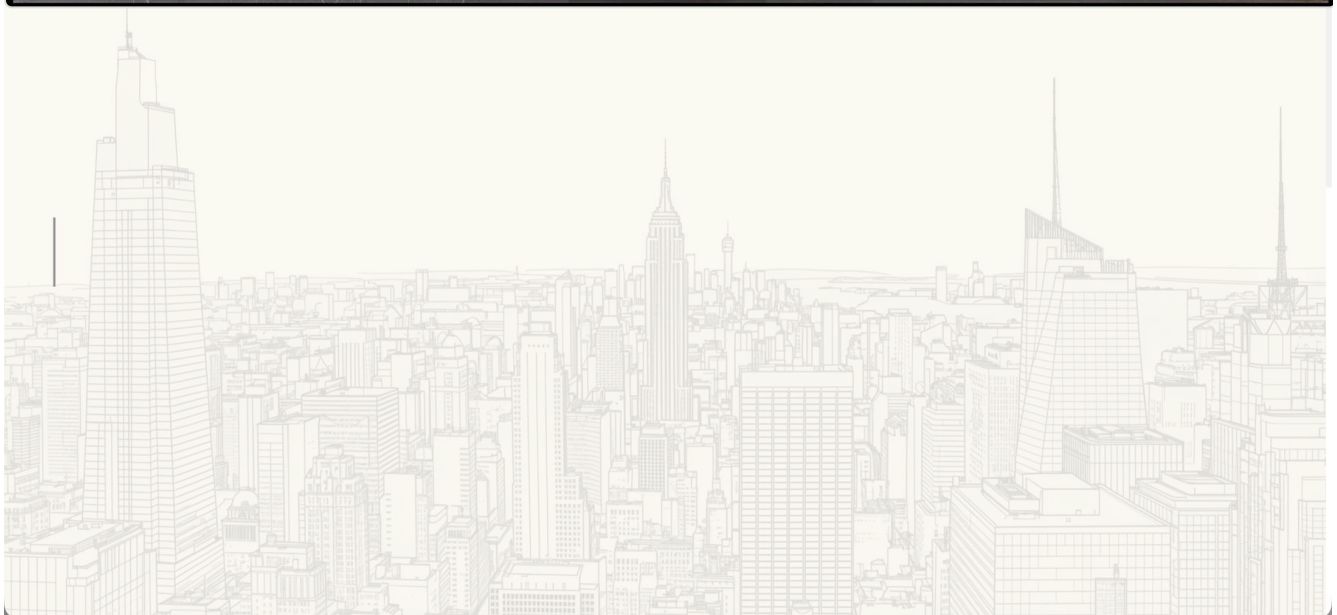

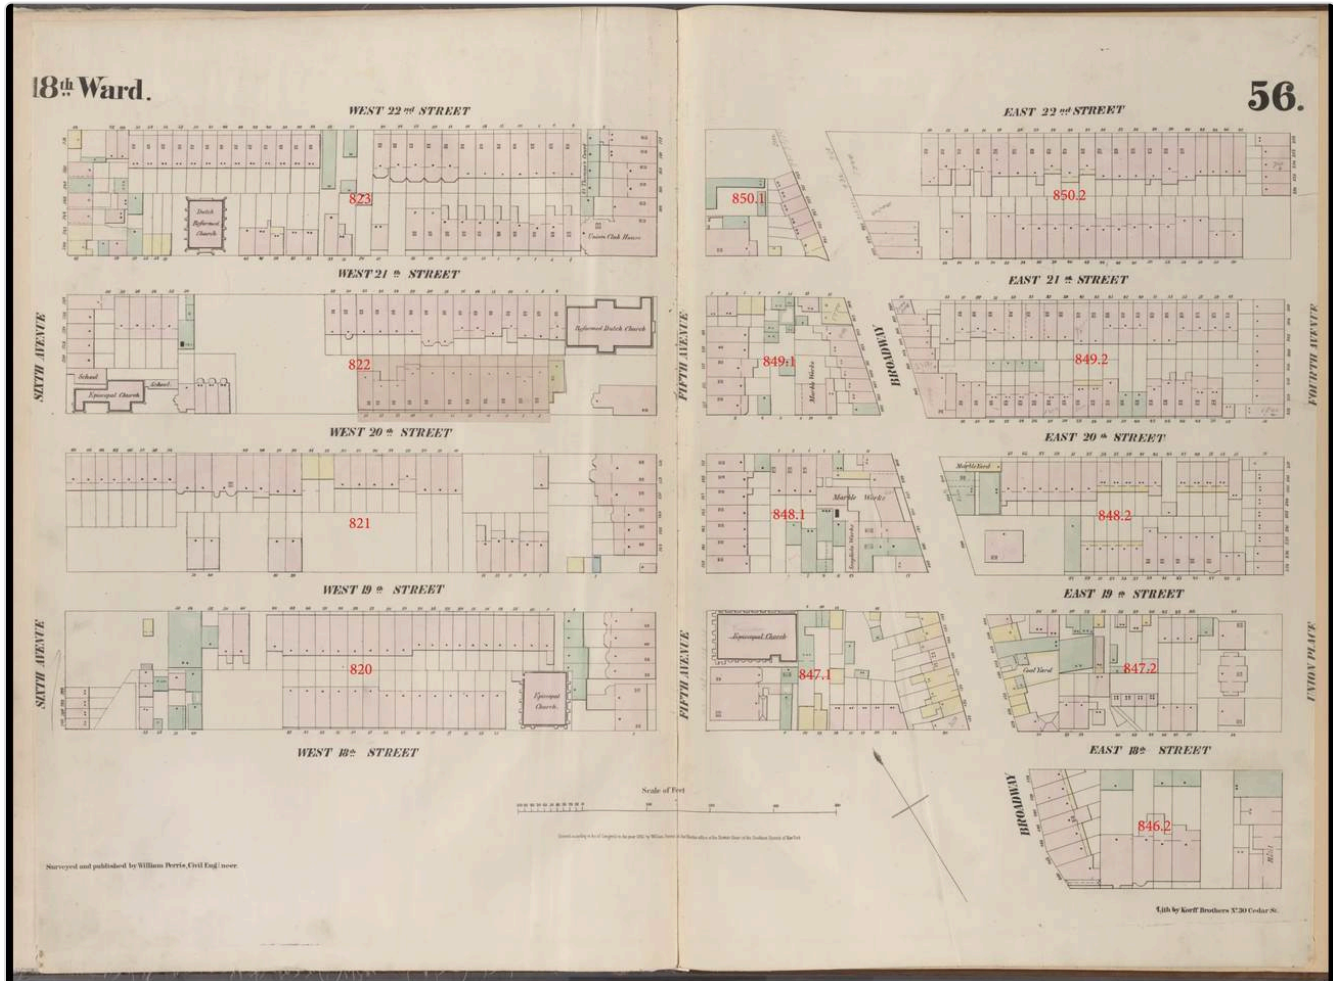

Arnold, Constable & Company Store, 1987.

W HOYT BUILDING, No. 873-79

(Also known as Aitken, Son & Company, A.A. Vantine & Company). 1868, by Griffith Thomas; expanded 1888, by DeLemos & Cordes; expanded 1901, by Thomas H. Styles. [6 stories] Together with the Arnold, Constable store, the Hoyt Building forms a massive, looming ensemble. Its marble façade has 48 enormous arched windows—larger than double doorways—capped by keystones and separated by three-quarter-round columns.

Quotes drawn from this page: 53

'sNice is an all-vegetarian café and coffee shop with counter service, dishing out some truly delish salads, sandwiches, pasta salads, and the like, alongside coffees, and teas. They frequently have fabulous vegan baked goods, and half of what's on the giant chalkboard menus is vegan. I'm addicted to their vegan panini and the vegan club. Both locations hang funky, affordable art by local artists. The Brooklyn location tends to be less crowded and is more sunny, but if you like nothing better on a Saturday night than to hang out in a coffee shop reading, the West Village location clears out as well. – Melissa Bastian ('sNice has THE most delicious cupcakes I've ever had, and they're vegan! You get a ton of food for your money. Their sandwiches are so thick you can't get them in your mouth in one bite. – Megan Garrity)

Mamoun's

119 MacDougal (@ W 3rd St) 212-674-8685
(Greenwich Village: A/C/E/B/D/F/M to W 4th St)
&
22 St Marks Pl (btwn 2nd & 3rd Ave) 212-387-7747
(East Village: 6 to Astor Pl)
www.mamounsfalafel.com

Everyone knows Mamoun's. It's cheap (\$2.50), it's quick, it's open late, and it's surprisingly good. You can also ask for hummus or baba ganoush to be added to your falafel for 50 cents or an order of falafel (without the sandwich) for just \$1. But the falafel joint across the street is the same price, and I think their falafel has more flavor. – Amanda Plumb (The East Village Mamoun's makes its own tamarind drink, along with fresh mango juice. – AH)

Temple in the Village

74 W. 3rd (btwn Laguardia Pl & Thompson St) 212-475-5670
(Greenwich Village: A/C/E/B/D/F/M to W 4th St)
This macrobiotic/vegan buffet is a little pricey but it's run by a really nice family. The food is tasty and next to the dosa cart guy on the south side of Washington Square and Mamoun's, this is the cheapest, most edible vegan food I know of on that side of town – Matana Roberts

Gramercy Park

Maoz

38 Union Sq E (btwn 16th & 17th) 212-260-1988
www.maozusa.com (Union Sq: L/N/Q/R/4/5/6 to Union Sq)
At Maoz you can get fried falafel in a pita, with hummus—and the best part is they have a bar with all these toppings, from beets to this cucumber sauce that's sooo good. It comes with giant fries. – Josh Medsker

Express Manna Kitchen

28 E 18th St (btwn Broadway & Park Ave) 212-228-1044
www.mannakitchen.com
(Gramercy Park: 4/5/6/L/N/Q/R to Union Square)
Express Manna Kitchen is this fast food Korean place that makes such a good tofu bowl! Eat it! – Dear Drunk Girl

Tiffin Wallah

127 E 28th St (@ Lexington) 212-685-7301
www.tiffinwallah.us (Gramercy Park: 6 to 28th St)
The tragedy of Tiffin Wallah's buffet lunch special is that my abdomen is physically incapable of holding "all I can eat." This alone keeps me from drinking the Kingfisher beers they keep on ice for degenerate businesspeople such as myself.

Hell's Kitchen/Midtown

Tanaka Sushi

222 51st St (btwn 2nd & 3rd Ave) 212-308-6976
(Midtown: 6/E/M to Lexington-3rd Ave-51st St)
Tanaka's two-roll lunch special is a mere \$8.25 and comes with miso soup and a salad. They have some really fab veg offerings like the mango roll, the sweet potato tempura roll, and the peanut roll! – Melissa Bastian

Zen Palate

663 Ninth Ave (@ 46th St) 212-582-1669
(Hell's Kitchen: A/C/E/N/Q/R/S/1/2/3/7 to 42nd St-8th Ave)
&
115 E 18th St (btwn Park Ave & Irving Pl) 646-291-2613
(Flatiron: L/N/Q/R/4/5/6 to Union Sq)
www.zenpalate.com

Unless you're on an expense account, stick to the weekday lunch specials, when you can fill up on Eggplant Zentastic, Shredded Melody, and Rose Petals with your choice of tea for less than ten bucks. Come dinner time, the prices skyrocket and the names get much more florid: Tapestry Embrace, Celestial Tofu, Wheel of Dharma... zinester, please! This is one of the more reliable vegetarian options in Times Square.

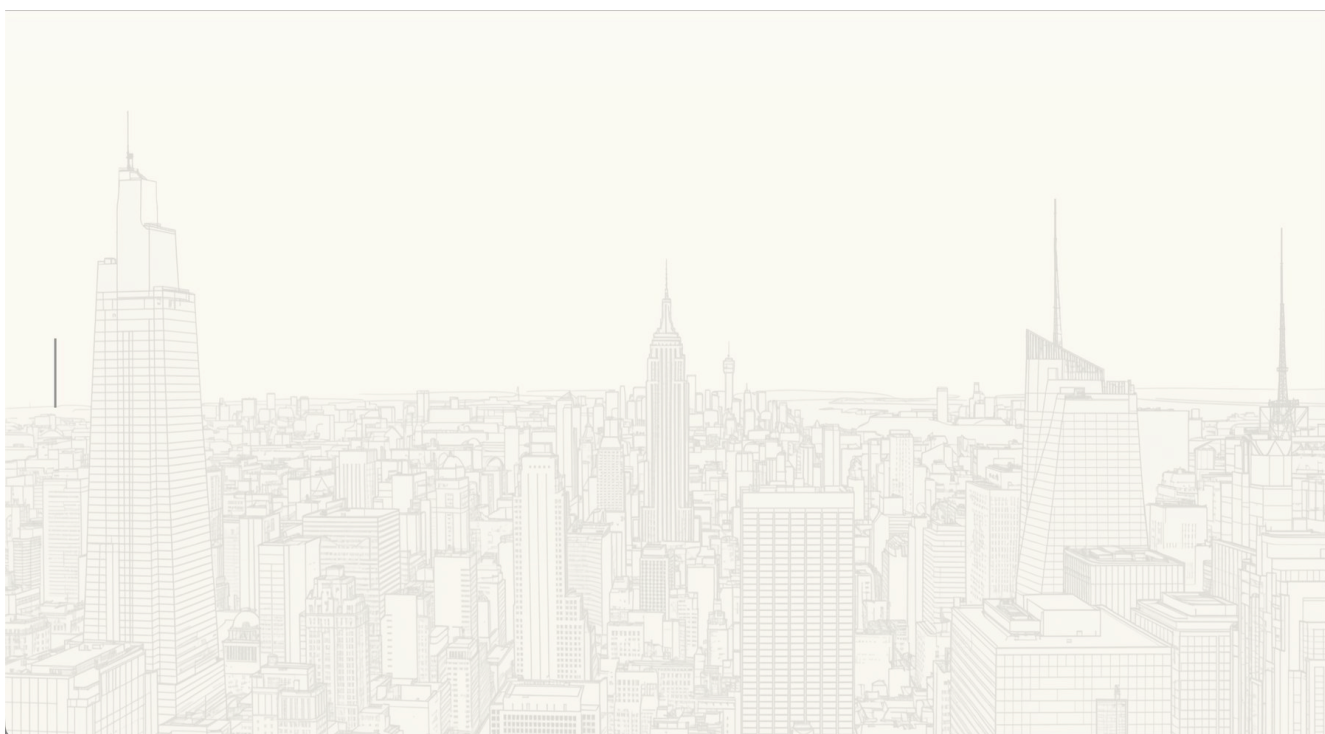

Harlem

Strictly Roots

2058 Adam Clayton Powell Blvd (btwn 122nd & 123rd) 212-864-8699 (Harlem: 2/3/A/B/C/D to 125th St)
I love, love, love this Rastafarian restaurant and regularly make the epic trek from all-parts Brooklyn just to have a serving of their tasty, tasty greens and other vegan delicacies. There is absolutely nothing you could order

Berman & Hederman, *New York City With Children*, 2014, p. 393

Quotes drawn from this page: 54

This Italian shoe brand ("the shoe that breathes") is the second-best selling brand of sports shoes in Europe, and is distinguished by its design and technology. The perforated outer sole features a waterproof membrane that lets feet breathe, but prevents water from penetrating (science lesson: the membrane's micro-pores are larger than water vapor molecules but smaller than water droplets). Breathable, non-slip, flexible, anti-bacterial, and waterproof or water-resistant, they're ideal for kids. The full line is carried in this U.S. flagship store.

Athletic shoes for boys include styles with soccer ball motifs, a style in neon lime and yellow, a white high-top with zipper closure, and a more subdued suede boating shoe. The girls' line includes athletic shoes, casual Mary Janes, studded denim high-top sandals, and a silver mesh ballet flat with a shoelace on the toe and neon lime trim. The kids shoes run from \$60 to \$80. Geox carries Italian sizes 26 through 37/38 (U.S. sizes 9 through 5½), and fit toddlers through about age 8. There's a smattering of kids apparel in the store, as well as the full range of men's and women's shoes and apparel.
